Steatohepatitis therapy: new uses for existing drugs

Nonalcoholic Steatohepatitis (NASH) is becoming the leading cause of liver transplantation in the UK, already affecting ~5% of the population, but with no approved treatment. The student will leverage our recent insights from artificial intelligence to discover new uses for approved drugs to treat NASH, accelerating efforts to bring successful therapies to the clinic.

Supervisory team: Dr. Zhou, Prof. O'Donnell, Dr. Pembroke (Cardiff University), Prof. Coward (University of Bristol)

Application deadline: 25 Nov 2019

Prospective start date: 1 Oct 2020
